Mobile Site User Guide

Content for the Journal of Oral Implantology (JOI) has now been optimized for mobile devices. In order to start using the mobile version, please follow the instructions below. The mobile version of JOI is currently accessible from devices running the following operating systems:

- iOS 3.1.3 or later
- Android 2.2 or later
- BlackBerry OS 6 (7.0 is not yet supported)
- Tablet devices that run iOS 3.2.2 or later and BlackBerryTablet OS are supported by the mobile site, however, you will not automatically be directed to the mobile site on a tablet (see step 3 below).

Getting Set Up

1. On your mobile device open your browser.
2. Go to this URL: http://www.joionline.org/

   Note: If you receive an error message because of “too many redirects” or “server not responding” check the cookie settings for your browser. Because this site can store your favorites and your login information, it requires that your browser’s cookies be set to “always”.

3. If you are on a tablet with a larger screen, you will be taken initially to the traditional online site, but you will see a “View Mobile Site” button at the top of the screen. Select that button.

4. To add an icon to your mobile device’s home screen, you will be presented with a message (displays briefly, and only the first time you go to the site) indicating you can install a JOI Mobile icon on your device’s home screen by clicking the bookmark link.

5. At any point you can add the icon to your home screen by tapping “Add to Home Screen”. You can then tap on the icon to return to the mobile site at any time.

6. Tap the JOI Mobile icon. You will see the JOI welcome screen as the mobile site loads.

7. Next you will see the home page for the mobile site. You will see this every time you go to the JOI Mobile site.
Log In to Get Access to Full Text: Individual Users

To save your preferences and to get access to the full text version of articles, you will need to log in with your email address and password just as you would on the full version of the site.

1. Click the “gear” icon at the top of the screen to open the settings screen.
2. Click the “My Account” option.
3. Click the “Login” option.
4. Enter your email address and password.
5. Click the Submit button, You will now be logged in to the site.
6. To view content, click the “Home” button at the top of the screen to return to the main screen.

Using the Mobile Site

In order to begin browsing content on the mobile site you will first need to choose and customize the journals that appear on your device. This only needs to be done the first time you access the mobile site.

Choosing titles to view

1. Tap Journals on the home page.
2. Tap Select to view the list of journals.
3. Scroll through the screen selecting the journal titles you would like to appear in your journal home screen. A check mark indicates the publication is selected.
4. Tap on the “Done” button at the top of the list to finish the selection process.
Navigation

Now that you have chosen titles to view, you can navigate into articles by first going to a publication where the volumes and issues will be displayed.

You can then choose an issue to view and you will see the titles of articles listed.

Once you have tapped on an article you will see new navigation tools at the top and bottom of the screen. These tools can be hidden by tapping anywhere on the page for easier reading of the article. If you tap on Select View you will see several options, including sections of the article and the figures. Tapping on Sections will bring up the main sections of the article you are viewing. There is also an option at the bottom of the article to view the PDF (not optimized for mobile viewing).
Search Function

There is also a search engine available on the Mobile site. From any screen you can click on the search icon to be taken to the search page. You can narrow the publications you would like to search and choose a field to search for. The default on both of these is to search all publications and fields. The search results will display the articles meeting the search criteria much as they look on a table of contents.

Should you need any further assistance, please contact the support staff at onlinepublishing@allenpress.com.
